## PROFILE

My Name is Bin Zeng, you can also call me Reeonce. I am a **23** years old boy, who is like to join your company and work on great projects which are iOS related.

## EXPERIENCE

### **Advancement @Home    2014.08 ~ now**

After completing one life-important event, I need to get my way to the new direction. I started to learn iOS development by reading Apple's docs and some books. I also worked on two APPs, the "Password Securer" and "Trap the Dot !".

**Passwords Securer.** I cannot remember so many passwords, but are the passwords keeper apps reliable? I prefer to working on my own passwords management app with Swift.

**Trap The Dot.** A very simple game based on SpriteKit with Objective-C.

### **Software Development Engineer, @Yahoo Beijing R&D    2013.07 ~ 2014.07**

As a freshman among so many talents at Yahoo, it is very difficult for me to achieve any feats. Luckily, as a traditional technical company, Yahoo has years of technology deposition, which I could learn much from. More than one years' time, I worked in the scrum team with my teammates, learnt development and CI on the backend, dealt with front-end issues. Two mainly projects was pushed online, the MYC and CKV.

**MYC.** A website based on Mojito(a open source Node.js framework) and YUI3. The website is international and ssl supported.

**CKV.** this project aims to provide a key-value storage service for yahoo mobile apps. As the major developer, I must deal with most of the things by myself, such as preparation for environment, development, CI and CD integration.

### **Bachelor's Degree on software engineering, @Beihang University(BUAA)**

**2009.09 ~ 2013.06**

During May 2012 to Oct 2012, I had an internship in Microsoft Asia STC for five months.

In Apr 2012, I got the second prize in the Twenty-Second Feng Ru Cup technology competition.

During Apr 2011 to Oct 2011, I joined in my school's ACM Programming Design Training, and got several prizes.

## MAJOR SKILLS AND PROJECTS

### **iOS developer**

Familiar with Objective-C, Swift and the main frameworks of iOS. And I know most used design patterns and algorithms.

### **Frontend Engineer**

Familiar with html, css and Javascript.

**Reeonce's Blog on Github.** A HTML5 + CSS + JS blog website based on Jekyll.

### **Backend Engineer**

Had been using Node.js for years, and I am familiar with working on linux.

## HOBBIES

Having been liking sports for a very long time, I prefer to reading, watch movies, thinking and cooking these days.
